

NORMAN SIDE

ACT TWO SCENE THREE

LIGHTS UP the VIDEO MONITORS.

NORMAN (CONT'D)

--And for tonight's "You Be The Judge" segment- Stem Cell Research. Now let me make this clear- and I'll be clearer than the President on this one- Stem Cell Research is MURDER. It's that simple. Stem cells are life in its beginning stages- and we are currently spending your tax payer dollars to KILL THEM. Now liberals will tell you that they're nothing more than just a mess of cells. Well, don't these same liberals also claim that all life on this planet derived from a mess of cells? You know- the so called Theory of Evolution. That's right, I said theory. Cause that's all it is. Notice no one ever calls it the "Fact of Evolution". So, say you actually believe this theory- then wouldn't you have to consider all "messes of cells" future life forms? And shouldn't all life forms not bred specifically by God for hunting, be protected? So doesn't it stand to reason, Stem Cells should be protected? You know- I hate that word, stem cell- it's just another liberal media biased politically correct term like "pro-choice" that's supposed to make the murder of innocents seem palatable. Let's call stem cells what they are- *really little babies*. And should our tax dollars be spent killing *really little babies*? Well- you be the judge. We'll be right back with C.S.I. star Gary Sinise.
